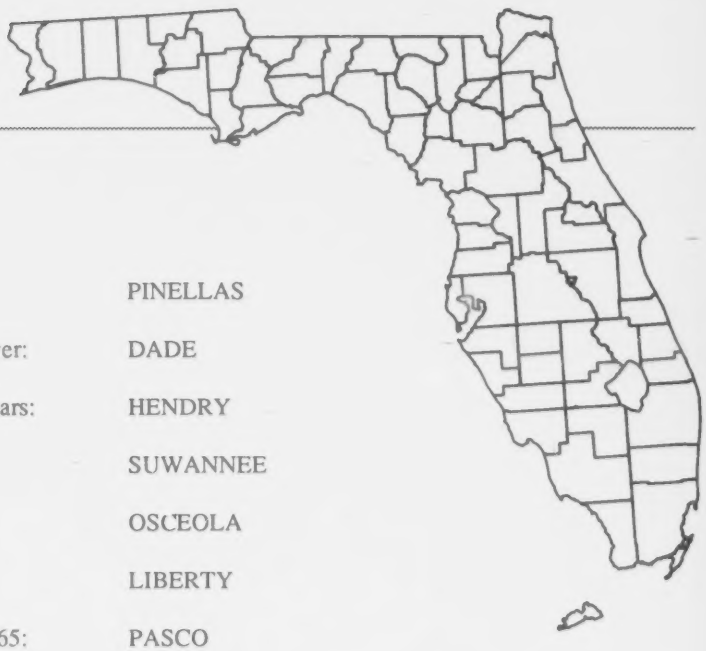
C6360-1-4

FLORIDA COUNTY PERSPECTIVES



Most People Per Square Mile:	PINELLAS
Greatest Number of People Age 65 and Over:	DADE
Highest Percentage of People Under 14 Years:	HENDRY
Lowest Arrest Rate:	SUWANNEE
Highest Proportion of Land in Farms:	OSCEOLA
Lowest Population:	LIBERTY
Highest Percentage of Veterans Over Age 65:	PASCO
Fewest Traffic Citations Issued:	LAFAYETTE
Highest Per Capita Income:	PALM BEACH
Highest Percentage of Registered Republicans:	COLLIER
Lowest Unemployment Rate:	MONROE
Most Municipalities:	PALM BEACH
Highest Percentage of High School Graduates Entering College:	CLAY

National Data Consultants

P.O. Box 6381 Athens, Georgia 30604 404-548-8460

Dear Reader,

This edition marks the fifth year of Florida County Perspectives. The purpose of the publication is to allow researchers and planners to gain an increased understanding of Florida's changing demographic and economic environment.

Special thanks are offered to Sue Boatright and Mick Ragsdale for helping compile and produce the publication.

If you have comments or suggestions about new data sources or how we can improve the format, please let us know.

HOW TO USE THIS BOOK

Understanding the dynamics of community growth and change is critical to planning effective business and government programs, regardless of the nature of the area. The first step in the process involves locating useful information. Incorporating statistical information into the research and planning process is important because contemporary communities are influenced by a growing number of demographic and economic forces. Every community, be it rural, suburban or urban, is continually changing. Even modest changes, such as aging, affect communities because older citizens have different spending habits, health needs and voting patterns than younger residents.

Effective planning can be conducted by using pre-existing or secondary data sources. A vast amount of information is regularly collected by numerous federal, state and private agencies, such as the Census Bureau, Vital Statistics Department, Department of Agriculture, Labor Department, Department of Education, utility companies and others. These sources, covering a multitude of subjects, are available for all 3,141 of the nation's counties. They are presented in a variety of different printed and computerized formats. With a modest amount of effort, planners can access and utilize literally tens of thousands of useful facts and figures.

The key to this method, however, involves putting the information into a format that can be interpreted and used in a constructive manner. Most of the data that is collected and published is produced on a county basis. Using county-level information may seem unwarranted to some, but it is the primary unit of federal and state government data analyses.

The role of the county in governmental and community affairs has a long tradition in the United States and stems from our adoption of English legal customs. For many researchers and planners the county has long been the effective unit of research and program delivery. The objection to considering the county as a unit of analysis occurs because several difficulties exist with equating the county with a community. Because the information is aggregated, it may present some problems in communities that are at the edge of a county, where several communities make up a county, or where people live in one county but work in another. When this occurs, the scope of the study should be expanded to include pertinent facts from the surrounding area. In addition, county residents frequently lack a feeling of unity that many researchers feel is necessary for a true community. Finally, some community scholars believe that an actual community does not have formal boundaries. The importance of the county, however, can be justified by the fact the Census Bureau and a myriad of other federal and state agencies routinely gather and publish a tremendous amount of county level data.

Secondary data sources are frequently several years old before they become available. The information, however, can be useful if several points are kept in mind. First, most counties do not experience large increases or decreases over a short time period. When rapid change does occur, it is often tied to a development, such as a power plant, military installation or public works project.

By using county level data and comparing it to a state or national average, an accurate picture of an area can be obtained. For example, per capita income estimates are developed for counties by the Bureau of Economic Analysis, but they are notoriously out of date. Structural changes, such as increases in income or education, do not occur rapidly. If the data is properly used it can still yield useful insights into the planning process.

The information in Florida County Perspectives represents the beginning step in the planning process. The book can be used in a number of different ways. First, it provides an illustration of what types of data are available. Second, it allows the reader to quickly build a composite social, economic and demographic profile of a particular county. Third, it permits comparisons to be made between individual counties and the state average. Finally, it allows the reader to see historical trends develop. Each year's book complements the previous edition and the 1987-1990 editions are available for $10.00 each.

All of the information in the book has been computerized for more detailed statistical analysis and is available in a Lotus format for $100.00.

TABLE OF CONTENTS

AGRICULTURE **1-4**
- Farms; Number, Average Size, Average Age of Farm Operator 1
- Farms; Number by Size 2
- Land in Farms, Harvested Cropland, Irrigated Land 3
- Proportion of Land in Farms, Map 4

CRIME **5-10**
- Arrests 5
- Full Time Law Enforcement Employees 6
- Incarcerated Offenders 7
- Offenses Reported 8
- Offenses Reported, Graph 9
- Crime Rate, Map 9
- Probationers/Parolees 10

ECONOMICS **11-20**
- Business Establishments and Employees 11
- Establishments by Industry 12-13
- Establishments by Industry, Graph 14
- Millage Rates 15
- Per Capita Income 16
- Per Capita Income, Graph and Map 17
- Total Personal Income 18
- Transfer Payments 19
- Transfer Payments, Graph 20

EDUCATION **21-30**
- Colleges and Universities 21-23
- Education Levels 24
- Education Levels, Graph 25
- Percent of Population Completing College, Map 25
- Public Elementary & Secondary Schools:
  - Enrollment 26
  - Funding and Funds Expenditure 27
  - Graduates, Dropouts, Non-Promotions 28
  - Salaries 29
  - Selected Staff Characteristics 30

GOVERNMENT **31-35**
- Registered Voters:
  - Democrats 31
  - Democrats and Republicans, Maps 32
  - Other Parties, Unaffiliated, Precincts 33
  - Republicans 34
  - Total Number and Election Results 35

HEALTH **36-44**
Accidental Death, Suicide, Homicide 36
Cancer and Heart Disease, Maps 37
Leading Causes of Death 38-39
Leading Causes of Death, Graph 40
Hospitals and Nursing Homes 41
Licensed Health Professionals 42-44

HOUSING **45-51**
Housing Characteristics 45
Housing Units Authorized in Permit-Issuing Places 46-51

LABOR **52-54**
Commuters 52
Labor Force Summary 53
Unemployment Rates, Graph and Map 54

NATURAL RESOURCES **55-59**
Land and Water Area, Population Density 55
Population Density, Graph and Map 56
Timberland by Stand-Size Class and Land Class 57
Timberland by Forest-Type Group 58
Timberland by Ownership Class 59

OCCUPATIONS **60-65**
Civilian Labor Force by Industry 60-62
Employed Persons by Occupation 63-64
Lawyers 65

POPULATION **66-90**
Age:
0-64, Median Age 66
Age, Graph 67
65 and Over 68
65 and Over, Graph and Map 69
Components of Change, Net Migration 70
County Seat, Incorporated and Unincorporated 71
Households 72
Municipalities (1970-1989) 73-78
Municipalities by Race 79-80
Race:
Black 81
Other Races, Spanish Origin 82
Percent Black, Graph 83
Percent Hispanic, Map 83
White 84

POPULATION (Continued)
Total Population:
Change in Total Population, Maps 85
Estimates and Projections 86
Percent Change 87
Total Population 88
Total Population Growth, Graph 89
Veterans 90

SOCIAL INSURANCE AND WELFARE 91-94
Aid to Families with Dependent Children 91
Food Stamps Issued 92
Social Security Beneficiaries 93
Total Assistance, Supplemental Security Income 94

TRANSPORTATION 95-110
Alcohol Related Traffic Fatalities 95
Alcohol Related Traffic Fatalities, Map 96
Centerline Miles and Daily Vehicle Miles Traveled 97
Revenue 98-99
Tags 100-101
Traffic Citations and Licensed Drivers 102
Traffic Fatalities and Crashes 103

VITAL STATISTICS 104-110
Deaths 104
Infant Deaths 105
Infant Deaths, Map 106
Live Births 107
Live Births to Unwed Mothers 108
Marriages and Divorces 109
Marriage and Divorce Rates, Maps 110

SELECTED COUNTY RANKINGS 111-115
Agriculture and Crime 111
Economics and Education 112
Government, Health and Labor 113
Population 114
Social Insurance and Vital Statistics 115

NOTES 116-117

SOURCES 118-122

* Metropolitan County

[1] See Notes

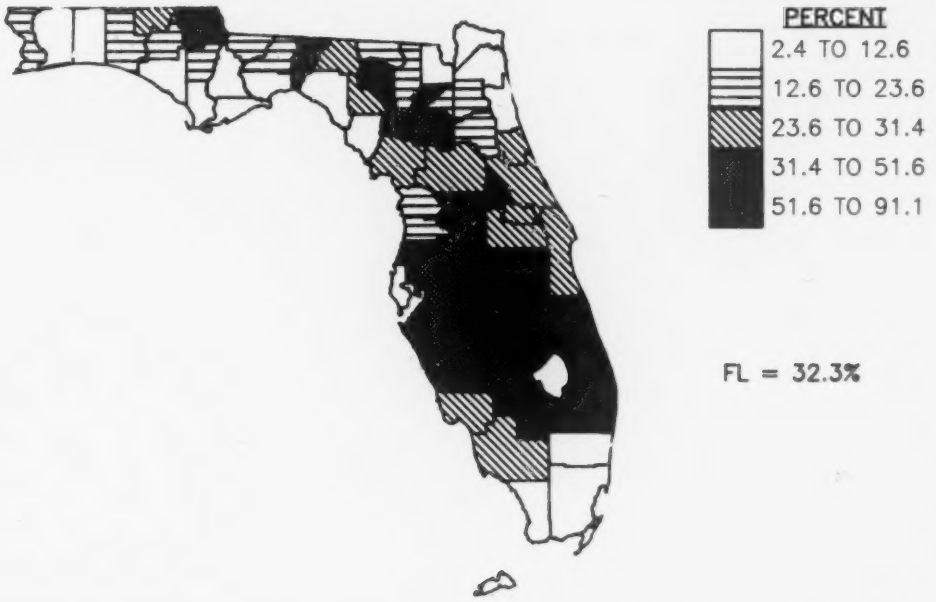
[2] Rank 1 = highest (range 1-64)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

--Data withheld to avoid disclosure of information about individual farms.

PROPORTION OF LAND IN FARMS

1987



Agriculture has undergone tremendous changes since World War II. Over the past five decades increased mechanization, the use of improved varieties, expanded markets, chemical fertilizer, insecticides and pesticides have transformed the production of food and fiber. Using the products of science and technology innovative farmers have changed American agriculture from a small scale, labor intensive business into a capital intensive, market driven, corporate enterprise.

The changing nature of agriculture has played a major role in shaping many of the South's demographic, economic and political trends. For example, the mass movement of people from rural to urban areas that began in the late 1920s was chiefly the result of the mechanization of agriculture which dramatically decreased the high dependence on farm labor. The boll weevil also played a role by its devastating effect on cotton, further reducing the need for a large rural labor force.

Agriculture in Florida, however, is in transition. The number of farms and proportion of land in farms has steadily declined. This decline has been influenced by a number of social and economic factors. Among these are advances in agricultural production, mechanization, a shift toward livestock enterprises and the development of off-farm employment. Urban sprawl and suburban growth also have contributed to this trend. Advances in transportation and communication, as well as non-farm employment opportunities, have made it possible for many people to live in rural areas without depending on agriculture for their livelihood.

Not only is the state losing farms, but the proportion of land in farms as well continues to decline. Reasons for the recent decline in farm land involve a combination of economic and changing policy issues. In the decade of the 1980s farmers witnessed low prices, high interest rates, international grain embargoes, increased foreign competition, unpredictable policies and record droughts. In addition, there has been overproduction from improved practices and the adoption of the conservation reserve program, which encouraged farmers to plant trees on highly erodible farm land. These factors all contributed to the reduction of farm land.

Rapid urban development, particularly suburbanization, has important implications for the state's agricultural industry. Questions of land use planning, water allocation, pesticide and insecticide handling, storage and disposal and taxation issues will all come into play as suburban development continues to encroach into agricultural areas.

* Metropolitan County

1
The 1988 county level offense data was not collected.
The data shown in this table is by geographic jurisdiction and is not intended to depict an individual law enforcement agency's activities.

2
Rank 1 = lowest (range, 1-67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

3

* Metropolitan County

[1] An establishment is a single physical location where business is conducted or where services or industrial operations are performed.

[2] Employment is the count of employees during the pay period that includes March 12, as reported on Internal Revenue Service Form 941, or as corrected by estimates in those cases where it was incompletely or improperly reported.

* Metropolitan County

1 An establishment is a single physical location where business is conducted or where services or industrial operations are performed.

2 Rank: 1 = Highest (range, 1-67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but idfferent ranks.

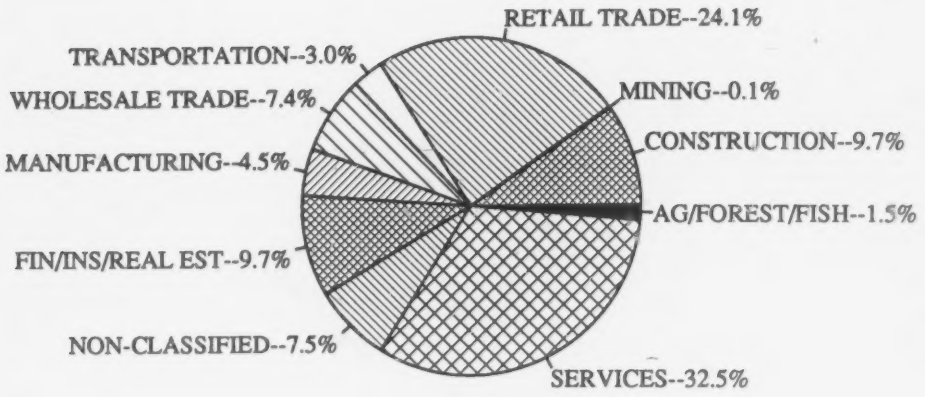
* Metropolitan County

1
An establishment is a single physical location where business is conducted or where services or industrial operations are performed.

2
Rank: 1 = highest (range, 1-67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

3
See Notes

ESTABLISHMENTS BY INDUSTRY
1988



TOTAL ESTABLISHMENTS
345,045

The information on this chart shows the number of firms in Florida on a percentage basis. In 1988 there were 345,045 business establishments in the state. An establishment is defined as a single location where business is conducted or where services or industrial operations are performed.

Service firms occupy the largest category of business establishments, representing about one-third of all firms in the state. Comprising one-quarter of all establishments, retail trade is the second largest sector. Financial and real estate and construction establishments are tied for the third largest sector, with each representing a little under ten percent. Agriculture, forestry and fisheries account for less than two percent and mining represents less than one percent of all of the business enterprises in the state.

A diversified economy, plus a well developed service economy is responsible for the state's low overall unemployment rate (a 5.9 annual average in 1990). States such as Louisiana and West Virginia, whose economies are highly dependent on single, natural resource-based commodities, have paid the price for relying on a single enterprise.

* Metropolitan County

[1] Rank 1 = highest (range 1-67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

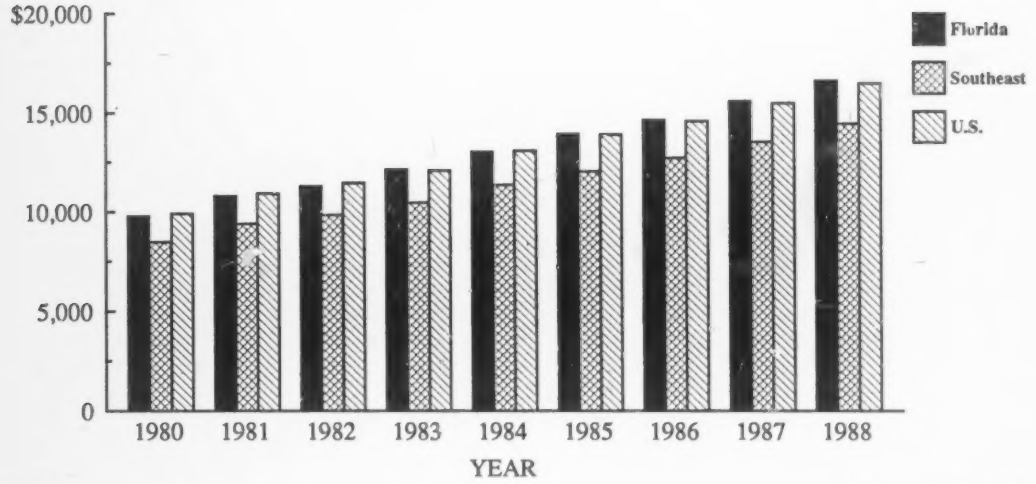
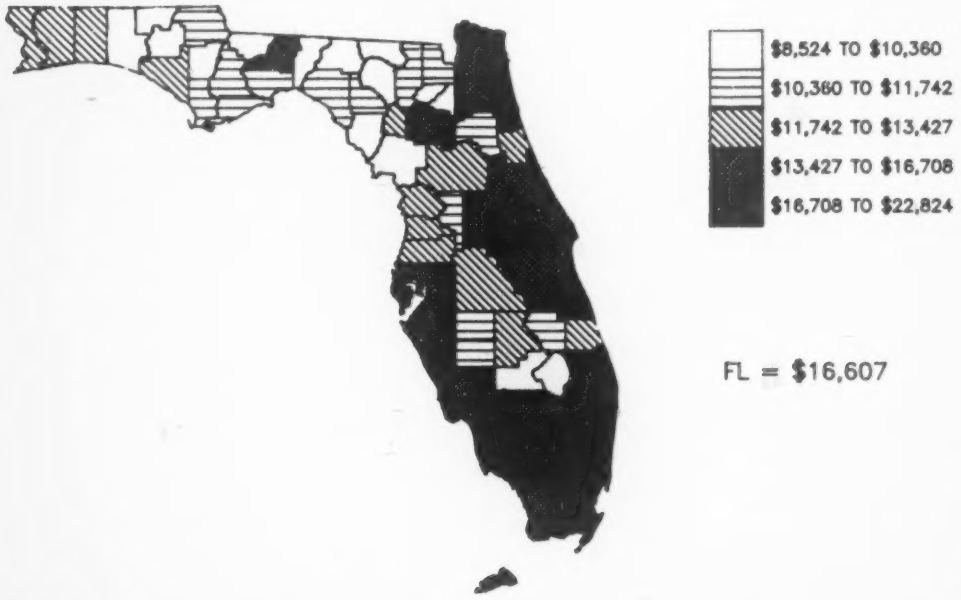
PER CAPITA INCOME
1980-1988



1988 PCI
Florida = $16,607

Southeast = $14,460
U. S. = $16,490

PER CAPITA INCOME
1988



ECONOMICS

TOTAL PERSONAL INCOME: 1982-1988

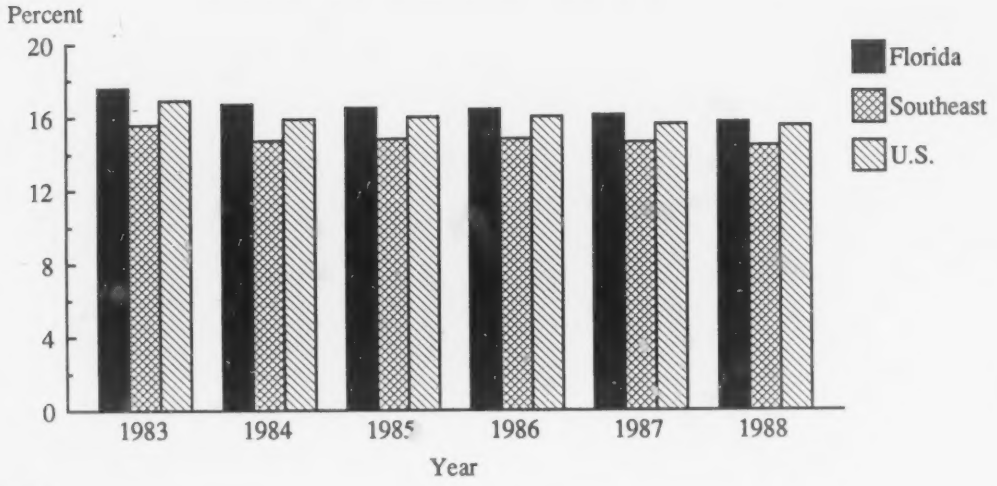
TRANSFER PAYMENTS: 1983-88
As a Percent of Total Personal Income



1988 Florida
Transfer Payments = $32.2 Billion
$2,067 Per Capita

Transfer payments include more than welfare subsidies. They are payments to persons from both government and business for which services are not currently rendered. Government transfer payments include payments under the following programs: federal old age, survivors', disability, and hospital insurance; supplementary medical insurance, state unemployment insurance; railroad retirement and unemployment insurance; government and private business retirement; federal and state government-insured workman's compensation; veteran's benefits, including veteran's life insurance; food stamps; supplemental security income; and direct relief and business losses.

Transfer payments accounted for 15.7 percent of the state's total personal income in 1988 compared to 14.4 percent for the nation. From 1983 to 1988, transfer payments increased by 40 percent, going from $22 billion in 1983 to $32 billion in 1988.

The majority of transfer payments involve retirement and disability payments. In Florida the increase in transfer payments generally reflects the trend of the changing age structure. A high percentage of transfer payments, however, can signify both affluence and poverty. The North Florida situation reflects an aging population highly dependent upon Social Security or other benefits. These benefits, while relatively low, constitute a large part of total personal income. The South Florida situation, however, indicates that this area has attracted a large number of affluent retirees. Their retirement benefits are derived from a variety of sources, not just Social Security.

* Metropolitan County

[1] Rank 1 = highest (range 1-67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

PUBLIC ELEMENTARY AND SECONDARY SCHOOLS FUNDING BY SOURCE AND FUNDS EXPENDITURE: 1988-89

County	Receipts (Dollars X 1,000) Total Revenue	Source: Federal	Source: State	Source: Local	Operating Tax Yield	Percent of Total Revenue: Federal	Percent of Total Revenue: State	Percent of Total Revenue: Local	Revenue per FTE: Dollars	Revenue per FTE: Rank [1]	Current Expense Per FTE (Dollars)	Total Expenditure All Funds (Dollars)

* Metropolitan County

[1] Rank 1 = highest (range 1-67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

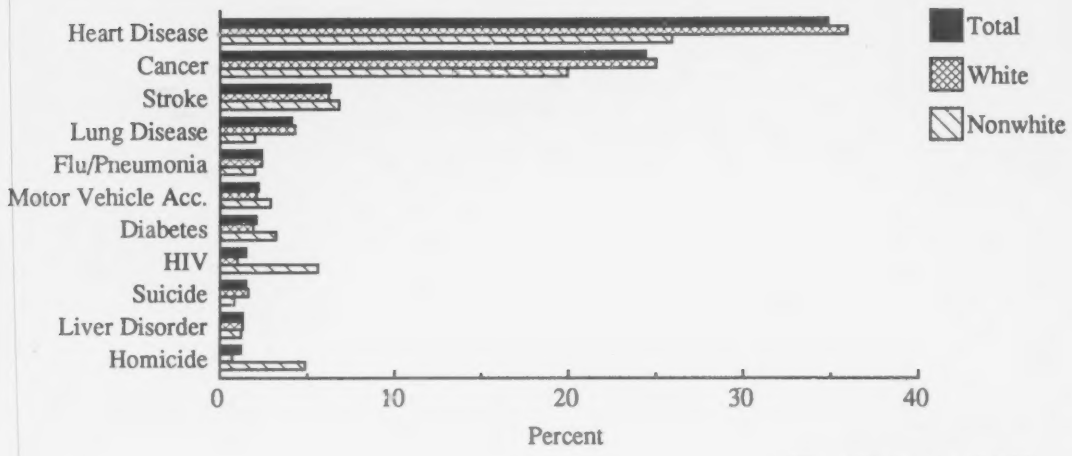
[2] Accidental Deaths covered on page 36

LEADING CAUSES OF DEATH: 1989



Total Deaths = 132,249
White Deaths = 117,195
Nonwhite Deaths = 15,001

The chart compares the leading causes of death in Florida for whites and nonwhites. In 1988, 132,249 people died in Florida. White deaths represented 88.6 percent while nonwhites accounted for 11.8 percent. Although the state's white population represents approximately three-quarters of the total population they accounted for almost 90 percent of all deaths. This is primarily due to the large white elderly population.

In 1989, the leading cause of death in the state for both whites and nonwhites was heart disease, followed by cancer, stroke and lung disease which tend to be associated with an aging population.

Homicide, diabetes, motor vehicle accidents and Aids (HIV) all account for more nonwhite than white deaths on a percentage basis. Suicide, however, claims more whites, particularly white males.

Nutrition, behavior, environment, socioeconomic position and access to health care systems contribute to the good health of both rural and urban residents. Of these factors, socioeconomic status may be the most important because nutrition, behavior and access to health care are strongly influenced by socioeconomic position.

* Metropolitan County

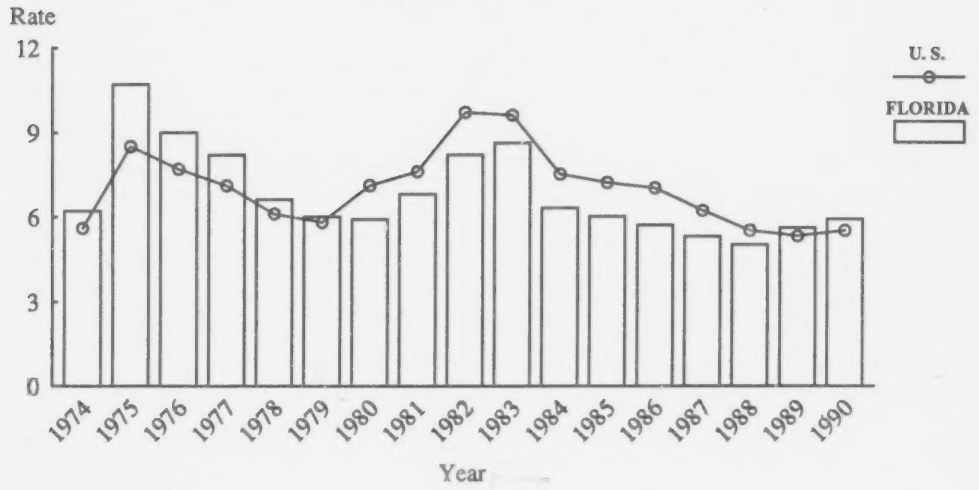
1
Statistical Note: The primary use of these data is for Federal fund allocation.
Caution is urged when using these data for short-term Economic analysis.
The sum of statewide employment and unemployment may not equal labor force due to rounding.

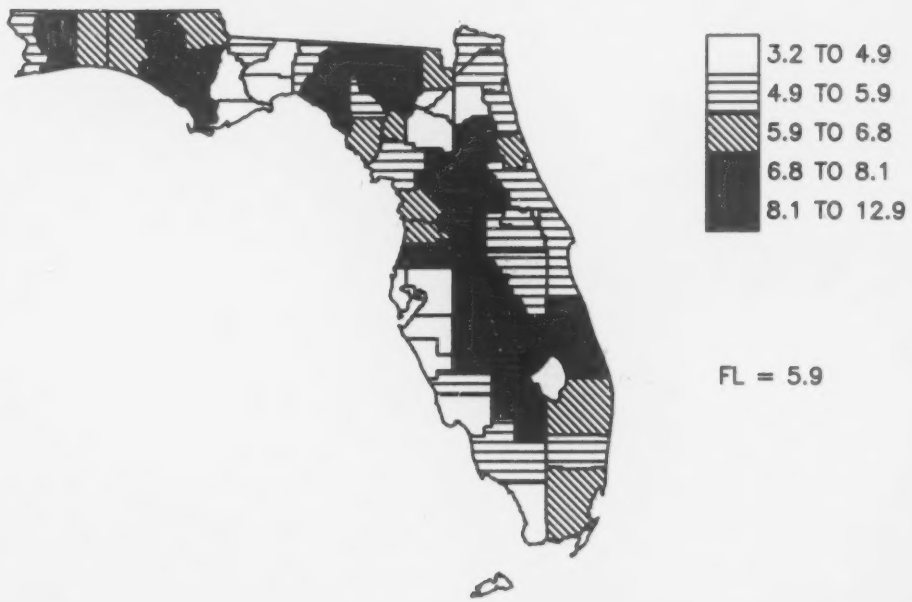
2
Rank 1 = lowest (range, 1-67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

UNEMPLOYMENT RATE ANNUAL AVERAGES
1974-1990



1990 Unemployment Rate
Florida = 5.9
U. S. = 5.5

UNEMPLOYMENT RATES: 1990



LAND AND WATER AREA, POPULATION DENSITY: 1930 - 1990

County	Area in Square Miles			Area in Sq. Kilometers			Rank of Size [1]	1990 Population Per Sq. Kilo. [2]	Population Per Sq. Mile [2]		1990 Rank of Population Per Sq. Mi. [1]

* Metropolitan County

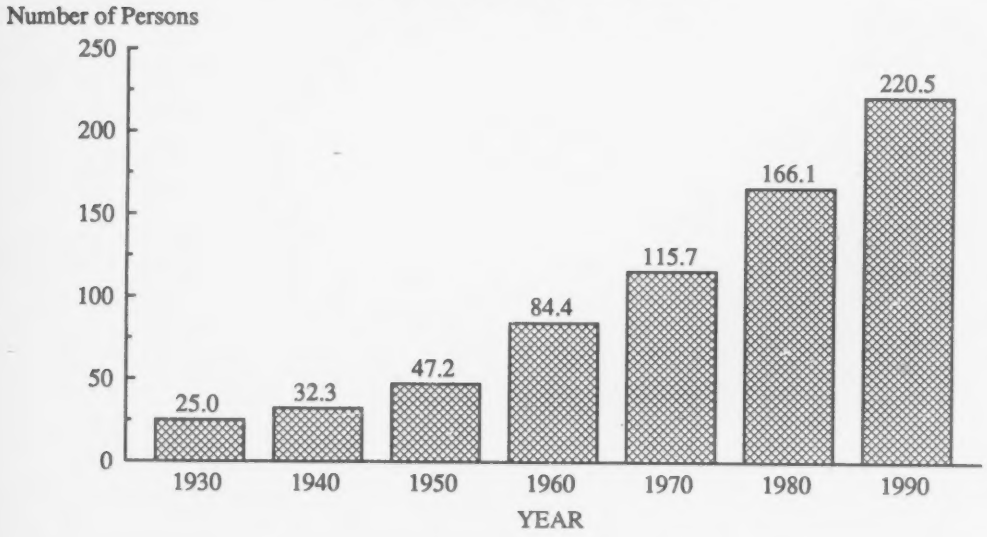
[1] Rank 1 = highest (range 1-67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

[2] Population Per Square Mile is calculated by dividing the total county population by the total number of square miles in each county.

1 square mile = 2.59 square kilometers

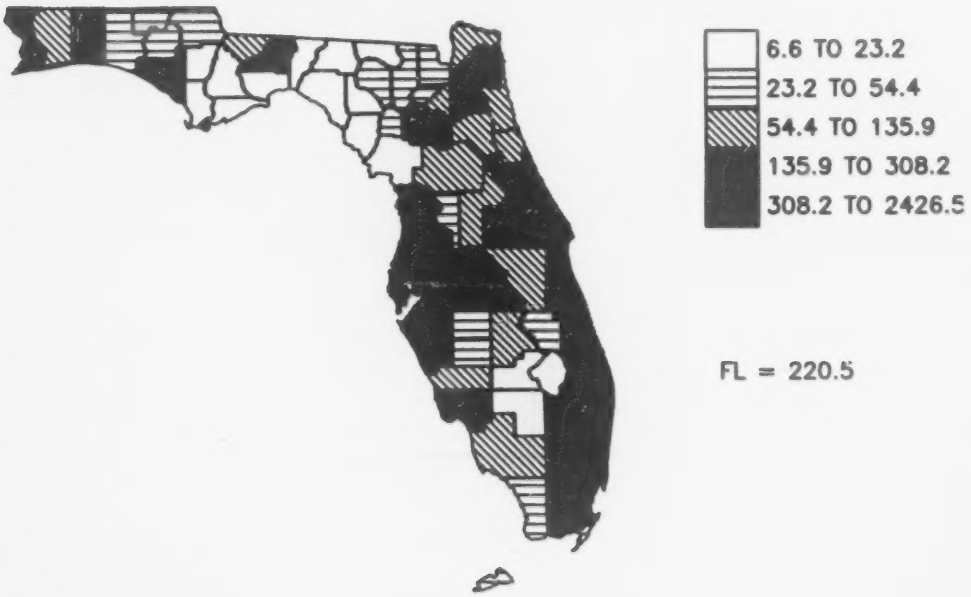
POPULATION DENSITY: 1930-1990

Persons per Square Mile



POPULATION DENSITY: 1990

Persons per Square Mile



TIMBERLAND BY STAND-SIZE AND LAND CLASS: 1987

County	All Land (Acres)	Forest Land (Acres)									Percent Forest Land of Total
			Timberland								
		Total	All Stands	Saw-timber	Pole-timber	Sapling-Seedling	Non-stocked Areas	Wood-land	Reserved Timber-land	Nonforest Land

[1] [2] [3]
Rank 1 = highest (range 1-67), (range, 1-66), (range, 1-64)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

* Metropolitan County

[1] Rank 1 = highest (range 1-67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

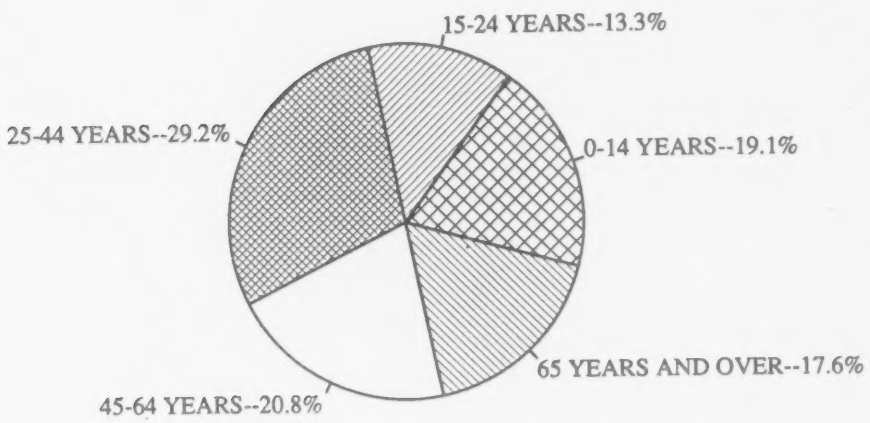
POPULATION BY AGE: 1989



TOTAL 1989 POPULATION: 12,797,318

In 1989, 17.6 percent of the state's population was over 65 years of age. Approximately one-fifth were in the 45 to 64 age category. Almost 30 percent were 25 to 44, and 13.3 percent were 15 to 24, while one fifth were under age 14.

Changes in the age structure have far-reaching social and economic effects because older people frequently are no longer active in the labor force and generally have different needs than the rest of the population. These include specialized health care, appropriate housing, financial assistance, estate planning, recreation and leisure-time facilities.

Research has shown that older residents frequently have higher voter participation rates than do young people. Older voters are more likely to be concerned with economic or "pocket book" issues since they usually live on fixed incomes. As a result, school bond referendums may likely face stiff opposition from the older segment of the population. The decreasing percentage of young people signals the beginning of labor shortages that will significantly affect American business activity in the near future.

There are great differences in the age structure of Florida's population when examined by race. The median age for whites is 37.4 years and 24.1 years for blacks. The reason for this disparity is higher birth and homicide rates and the overall lower life expectancy of the black population. Differences in age might seem unimportant at first glance, but they reflect other more serious problems faced by Florida's black population; namely, births to unwed mothers, high homicide rates and health and economic problems which limit life expectancy.

The aging of the population will cause a dramatic increase in the number of elderly poor as people live longer than their retirement savings can support them, or as they age to the point where they need long-term professional care. The public sector will increasingly be called upon to provide humane care for the growing numbers of poor and ill older persons unable to afford medical care.

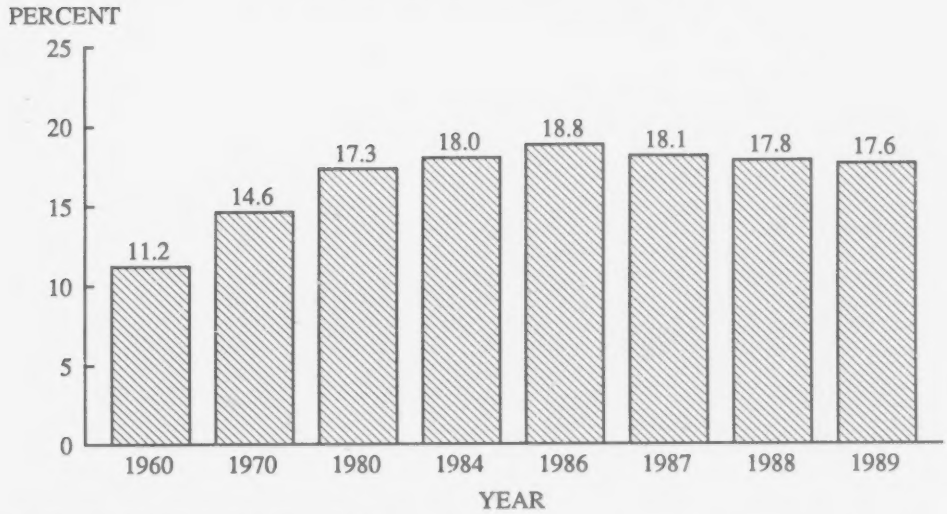
* Metropolitan County

Note: County totals may not add to state totals because of rounding.

[1] Estimates

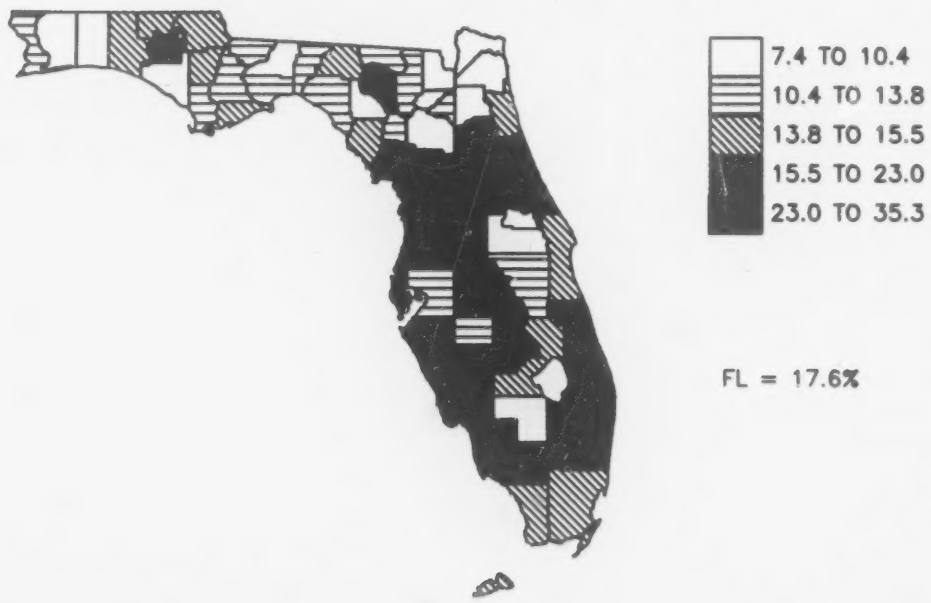
[2] Rank 1 = highest (range 1-67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

POPULATION 65 YEARS AND OLDER: 1960-1989
Percent of Total Population



Percent Change in Population 65 and Older
1980 - 1989 = 33.5%

AGE 65 AND OVER: 1989
Percent of Total Population



POPULATION

COMPONENTS OF CHANGE; NATURAL INCREASE AND NET MIGRATION: 1980-1989

* Metropolitan County

--No data available

[1] Estimate

[2] Rank 1 = highest (range 1-66)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

POPULATION

HOUSEHOLDS AND AVERAGE POPULATION PER HOUSEHOLD: 1970 - 1989

County	Number of Households				Percent Change in Number of Households				Average Population Per Household

* Metropolitan County

[1] Rank 1 = highest (range 1-67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

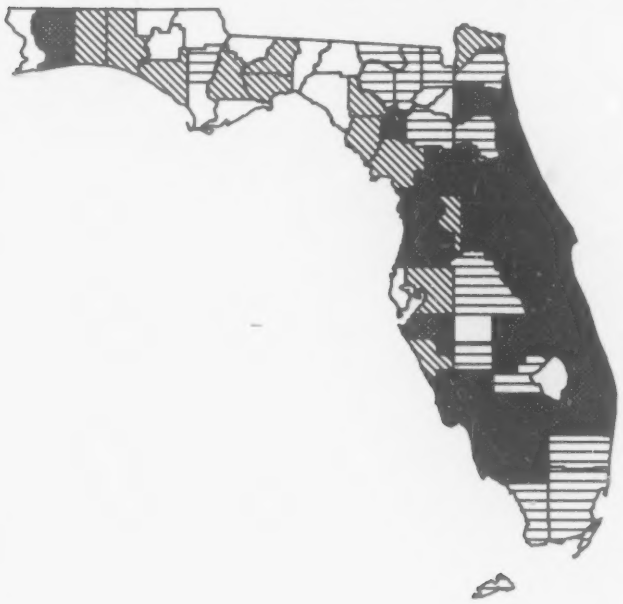
PERCENT CHANGE IN POPULATION

1980 – 1990

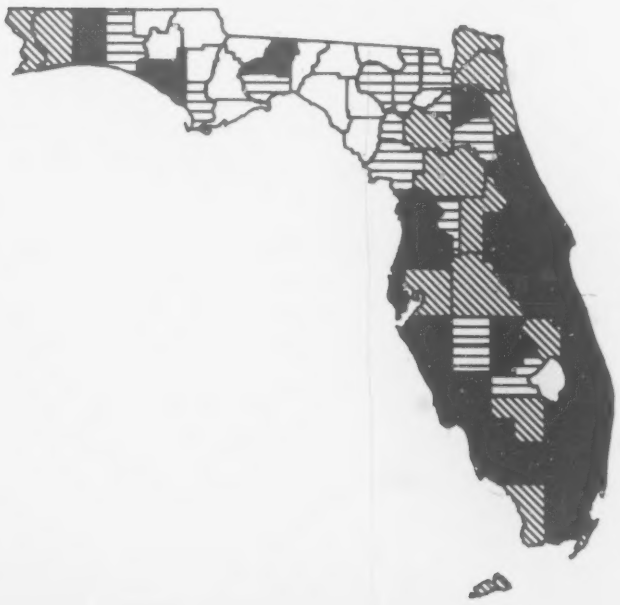


−1.4 TO 17.0
17.0 TO 28.7
28.7 TO 38.2
38.2 TO 58.1
58.1 TO 163.0

FL = 32.7%

PERCENT CHANGE IN POPULATION

1930 – 1990



−15.8 TO 64.9
64.9 TO 261.5
261.5 TO 638.1
638.1 TO 1445.2
1445.2 TO 6148.1

FL = 781.2%

POPULATION

* Metropolitan County

[1] Rank 1 = largest (range, 1-67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

[2] Projections are based on different sets of assumptions regarding the growth of a county. In this table the projections represent the middle or medium series.

PERCENT CHANGE IN TOTAL POPULATION: 1930 - 2000

* Metropolitan County

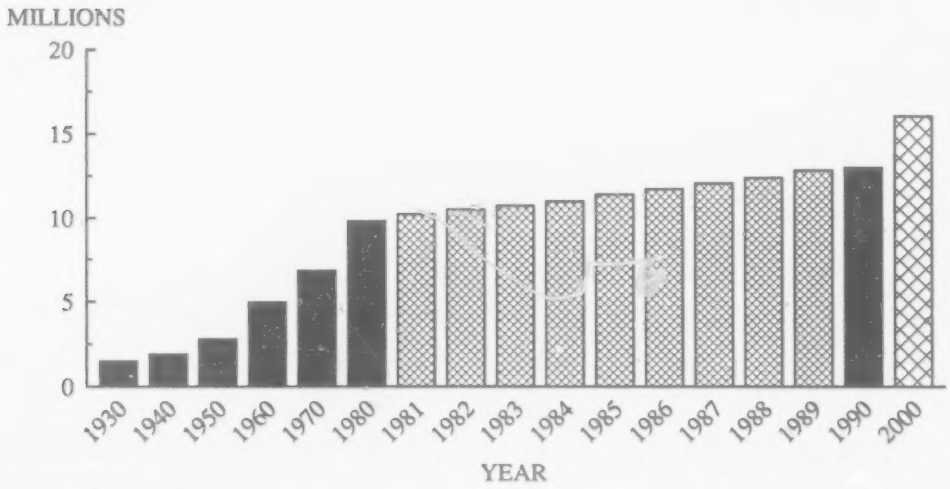
[1] Rank: 1 = largest (range 1-67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

POPULATION GROWTH: 1930-2000*



* 1981-1989 Estimated
2000 Projection

Percent Change in Population
1930 - 1990 = 781.2%
1990 - 2000 = 23.6%

Florida's population has increased every decade since the 1930s. The state's early growth was characteristic of many urban areas in the South which have historically attracted large numbers of people who left farming and declining rural areas and moved to the cities. The state's recent growth, however, reflects the dynamic, vibrant economy that exists in Florida's urban centers. During the 1980 to 1990 time period, Florida's total population grew by 32.7 percent, making it the fourth fastest-growing state in the nation. Florida ranked third in terms of numerical growth, and has the fourth largest population of any state.

Population changes three ways: people are born, they die or they move. During the decade of the 1980s, 88 percent of the state's population growth was due to new residents. In fact, in-migration is so important to the state's population growth that 12 counties have had more deaths than births! Yet, except for Pinellas County, these 12 counties have all grown by more than the state average.

Growth makes present and future planning challenging. Population growth affects business patterns, schools, health care and housing construction as well as the overall social and economic vitality of the community. A rapidly growing population complicates long range development unless solid and broad based planning becomes an integral part of a community's future directions. Exceptionally high rates of growth have resulted from retirees whose presence creates additional growth from the emerging service-dominated economy.

New people moving into a community can cause numerous problems for decision makers attempting to provide services to both new and long-term residents. New residents frequently have different attitudes, values, and beliefs than local people, and in some cases these differences may lead to community conflict. New residents also have different developmental priorities than long-term residents, which may present difficulties in achieving consensus regarding local needs.

New residents, however, can bring new capital and opportunities and create jobs in their host communities by their very presence. Gas stations, dry cleaners, restaurants, grocery stores, and the service economy in general benefit from the influx of new residents. Striking a balance, however, in the effects of growth from new people can take time and effort, especially in anticipating the nature and scope of both short and long term community needs.

POPULATION

* Metropolitan County

1 Data are estimates based on a 10 percent sample.

2 Rank 1 = highest (range 1-67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

SOCIAL INSURANCE AND WELFARE

TOTAL DIRECT ASSISTANCE, SUPPLEMENTAL SECURITY INCOME: 1988-89

County	Total Direct Assistance (Dollars) [1]	Supplemental Security Income: Old Age Assistance — Average Monthly Cases	Old Age Assistance — Amount (Dollars)	Old Age Assistance — Percent of Total Assistance	Aid to the Blind — Average Monthly Cases	Aid to the Blind — Amount (Dollars)	Aid to the Blind — Percent of Total Assistance	Aid to the Disabled — Average Monthly Cases	Aid to the Disabled — Amount (Dollars)	Aid to the Disabled — Percent of Total Assistance

* Metropolitan County

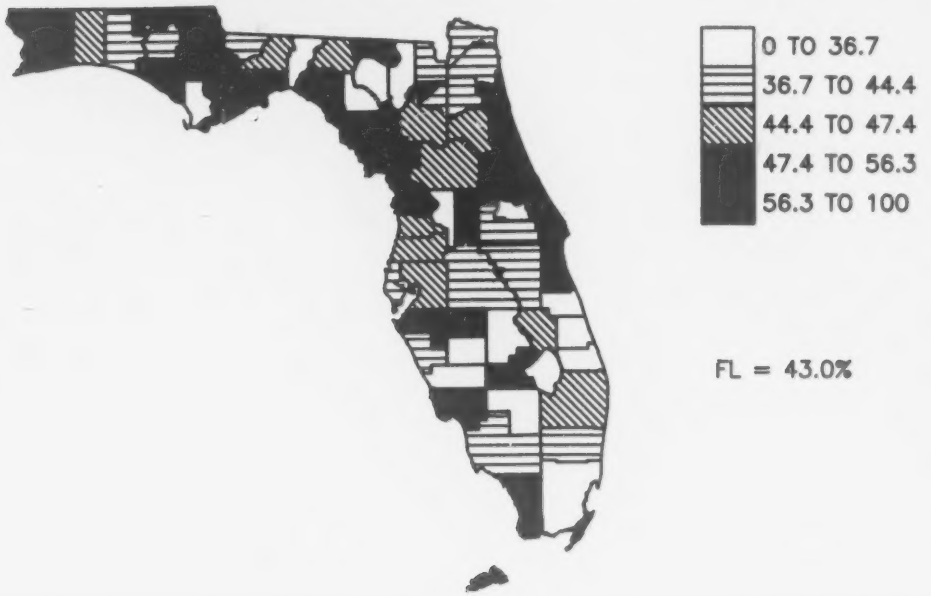
0 Represents an increase or decrease from a zero base.

1 Rank 1 = lowest (range, 1-67).
2 (range, 1-65)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

ALCOHOL RELATED TRAFFIC FATALITIES: 1990

Percent of Total Traffic Fatalities



The map shows 1990 alcohol related traffic fatalities as a percentage of all traffic fatalities on a county-level basis. Tragically, 43 percent of all traffic fatalities were alcohol related. On a county basis the percentage ranged from a low of 0 in Lafayette County to a high of 100 percent in Liberty, Franklin and Gilchrist counties.

The counties in the high percentage category (56.3 to 100%) of alcohol related traffic fatalities are scattered across the state. Since 1987, 5,842 people have died as a result of drinking and driving on a statewide basis. During the same time period, however, alcohol traffic related deaths decreased by 15.9 percent.

* Metropolitan County

[1] Rank 1 = highest (range, 1-67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

[2] Totals include revenue outside the computer system.

* Metropolitan County

[1] Rank 1 = highest (range, 1-67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

[2] Includes revenue outside the computer system

TRANSPORTATION

TRAFFIC CITATIONS AND LICENSED DRIVERS: 1982-1990

* Metropolitan County

0 Represents an increase or decrease from a zero base

1 Rank 1 = highest (range 1-67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

* Metropolitan County

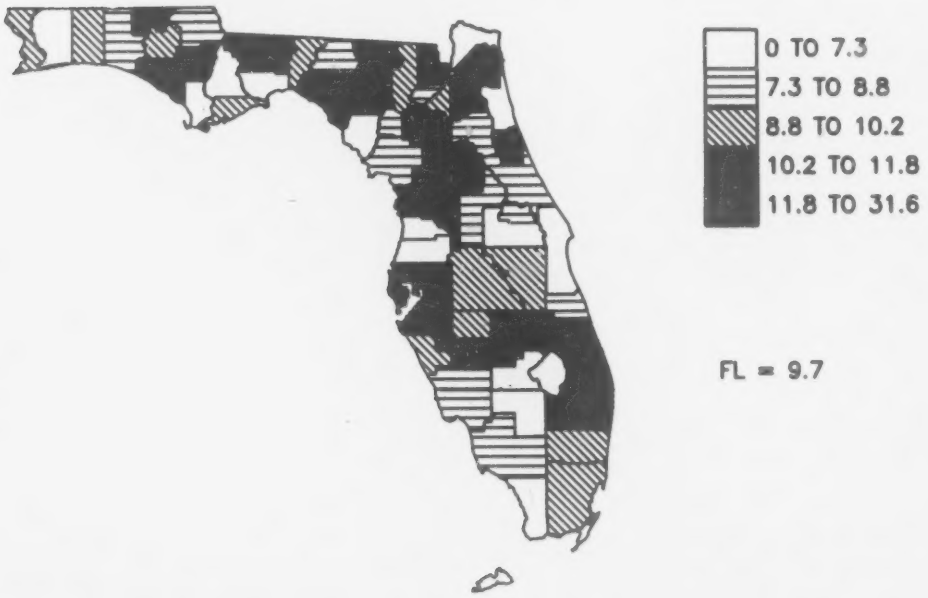
1 Events occurring to Florida residents regardless of the place of occurrence.

2 See notes

3 Rank 1 = Lowest (Range 1 - 67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

INFANT DEATH RATES: 1990



Infant mortality rate is the number of deaths under the age of one per 1,000 live births. It is considered to be a prime indicator of the overall health and well being of a society. Pronounced differences exist among counties. In general, counties with high infant mortality rates tend to be rural, have low educational attainment levels and high concentrations of minorities.

The commonly advanced explanation for high infant mortality is the lesser availability of prenatal care to disadvantaged segments of society. Others reasons include a high proportion of low weight births, births to unmarried mothers and births to mothers who are themselves children.

About ten percent of infant deaths occur in the first hour after birth, forty percent within the first day, and more than 60 percent within the first month. This emphasizes the need for outreach programs for poor or undereducated pregnant women, for accessible prenatal and obstetrical care, and for pediatric care and advice following birth.

LIVE BIRTHS (RESIDENT): 1985-1990[1]

* Metropolitan County

1
Events occurring to Florida residents regardless of the place of occurrence.

2
See Notes

3
Rank 1 = highest (range, 1-67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

* Metropolitan County

[1] Rank 1 = highest (range 1-67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

SOCIAL INSURANCE, TRANSPORTATION AND VITAL STATISTICS

County	Percent AFDC of Total Households		Percent Alcohol Related of Total Traffic Fatalities		Percent of Live Births to Unwed Mothers to Total Births Within Racial Groups: 1990				1990 Rates Per 1,000 Population

* Metropolitan County

[1] Rank 1 = lowest (range, 1-67)

[2] Rank 1 = highest (range, 1-67)
When counties share the same rank, the next lower rank is omitted. Because of rounded data, counties may have identical values shown, but different ranks.

NOTES

In every table counties with an asterisk (*) beside their name are metropolitan counties.

A metropolitan county is a county that is part of a Metropolitan Statistical Area (MSA). All other counties are non-metropolitan counties. In 1990 Florida had 32 metropolitan and 35 nonmetropolitan counties.

The general concept of a metropolitan area is one of a large population nucleus, together with adjacent communities which have a high degree of economic and social integration with that nucleus.

Each MSA has one or more central counties containing the area's main population concentration: an urbanized area with at least 50,000 inhabitants. An MSA may also include outlying counties which have close economic and social relationships with the central counties.

Page 1 **AGRICULTURE**
Farms, Farm Size and Age of Operator: 1969-1987

1
A farm, as defined for the 1974, 1978, 1982 and 1987 censuses, is any place from which $1000 or more of agricultural products were produced and sold or normally would have been sold, during the census year.

The previous definition used for the 1959, 1964, and 1969 censuses counted a farm as any place with less than 10 acres from which $250 or more of agricultural products were sold or normally would have been sold during the census year, or any place of 10 acres or more from which $50 or more of agricultural products were sold or normally would have been sold during the census year.

Page 8 **CRIME**
Offenses Reported: 1988

3
Percent Cleared: For crime reporting purposes, a crime index offense is cleared when a law enforcement agency has identified the offender, there is enough evidence to charge him and he is actually taken into custody. The arrest of one person can clear several crimes or several persons may be arrested in the process of clearing one crime.

Crime solutions are also recorded in exceptional circumstances when some element beyond law enforcement control precludes formal charges against the offender.

$$CrudeDropoutRate = \frac{TotalDropouts}{TotalEnrollment} \times 100$$

NOTES

Page 19 **ECONOMICS**
Transfer Payments: 1983-1988

1
Transfer payments to persons are income flows from both government and business -- for which services are not currently rendered. Government transfer payments include payments under the following programs: federal old age, survivors', disability, and hospital insurance; supplementary medical insurance; state unemployment insurance; railroad retirement and unemployment insurance; government retirement; federal and state government-insured workman's compensation; veteran's benefits, including veteran's life insurance; food stamps; black lung payments; supplemental security income; and direct relief. Government payments to non-profit institutions, other than for work under research and development contracts, are also included. The principle business transfers are liability payments for personal injury, corporate gifts to non-profit institutions, and consumer bad debts.
